

Aloha, I am interested in serving on the Deferred Compensation Plan Committee and would welcome the opportunity to contribute in a thoughtful and responsible way. Through managing federally funded projects and overseeing budgets, financial tracking, and compliance reporting, I have developed solid foundational financial knowledge and an appreciation for accountability and risk management.

In my current role as a Program Manager, I regularly review complex information, apply rules and policy requirements, and exercise independent judgment to ensure transparency and compliance. I understand the importance of fiduciary responsibility and would approach this role with care, diligence, and a commitment to acting in the best interests of plan participants.

I bring collaborative working experience, strong communication skills, and the ability to analyze information objectively. While my knowledge of 457(b) deferred compensation plans is at a beginner level, I am willing and motivated to learn the governing principles and practices to effectively support the Committee's work.

I am detail-oriented and prepared to contribute to both the immediate oversight needs and longer-term strategic objectives of the Plan to benefit City workers and their families.
