Q3 2025 | Economic Review

GDP	The U.S. economy expanded 3.8% on an annualized basis in the second quarter of 2025, according to the U.S. Bureau of Economic Analysis. Second quarter growth was aided by a decrease in imports, along with an increase in consumer spending and business investment. Despite a strong rebound in output following a contraction in the first quarter, growth is expected to moderate over the balance of the year.
JOBS	Labor market conditions weakened over the third quarter, with measures of unemployment and underemployment increasing in both July and August, with wage growth softening as well. Labor supply factors (i.e. labor force participation rate, levels of immigration, etc.) impacted the broader employment picture over the quarter, despite a generally strengthening U.S. economy.
FED POLICY	In the third quarter, the Fed lowered interest rates, electing at its September meeting to reduce the Federal Funds Rate by a quarter of a point (current range: 4.00-4.25%). Additionally, Fed officials projected another 1-2 rate cuts over the remaining portion of the year.
INFLATION	Measures of inflation (August CPI-U: 2.9%) increased over the third quarter, with core goods and service prices both experiencing price growth over the last several months.

Q2 2025 GDP		August Inflation Rate		August Unemployment Rate	
3.8%	vs. 2.7% 10-year quarterly average (annualized)	2.9%	vs. 3.1% 10-year quarterly average (annualized)	4.3%	vs. 4.6% 10-year quarterly average (annualized)

3. Inflation measured as CPI-U (Consumer Price Index – All Urban Consumers). CRC 4914969 10/2025

Q3 2025 | Global Financial Markets

Performance Review

- Domestic equity markets followed second quarter results with strong absolute performance in Q3, as macroeconomic resiliency, corporate fundamentals and the prospect of more accommodative monetary policy buoyed returns.
- Fixed income markets also performed well, with falling Treasury yields and tightening credit spreads aiding performance across market segments.
- International equity markets advanced for a third consecutive quarter as global trade tensions cooled, and global central banks pivoted towards policies of accommodation.
- Falling interest rates across regions aided real estate equities over the third quarter of the year.

Q3 2025 | Domestic Equity Market Highlights

U.S. Equity Markets

- U.S. equity markets posted a second consecutive quarter of strong growth (S&P 500 Index 8.1%). Smaller capitalization companies also advanced sharply (Russell 2000 Index 12.4%), as investors largely shrugged off lingering uncertainty over the impact of trade and economic policy.
- Market gains were broad, with 10 of 11 sectors experiencing positive returns over the past three months.
- Growth-oriented sectors generally led markets higher (Comm. Services 12.0%; Tech 13.2%).
- More defensive sectors (Staples -2.4%; Healthcare 3.8%) underperformed amidst an environment favoring higher risk sectors.

Q3 2025 | International Equity Market Highlights

International Equity Markets

- International equity markets largely followed U.S. markets higher over the quarter as trade tensions cooled (MSCI ACWI ex USA Index 6.9%).
- Emerging markets (MSCI EM 10.6%) strongly outperformed developed markets (MSCI EAFE 4.8%) over the quarter, as Chinese equities (MSCI China 20.7%) led markets higher.
- Local political tensions negatively impacted domestic markets in France and Germany (MSCI France 3.2%; Germany -1.1%), while Japanese markets benefitted (MSCI Japan 8.0%) from the prospect of changing political leadership.
- The US dollar weakened somewhat over the quarter, aiding domestic investor returns in international markets.

Q3 2025 | Global Fixed Income

Global Fixed Income

- In anticipation of interest rate cuts from the Federal Reserve, Treasuries yields fell across maturities over the third quarter, aiding returns across market segments (Bloomberg US Aggregate 2.0%).
- Spreads continued to narrow across the credit quality spectrum, leading to outperformance from credit markets (Bloomberg US Credit 2.6%; High Yield 2.5%).
- International bond market returns were disparate, as emerging market issuers performed strongly, while developed issuers, particularly in Asian markets, underperformed.

Q3 2025 | Fixed Income Credit Spreads

Figure 10. Historical Option-Adjusted Spreads (OAS)

September 2005 to September 2025

Figure 11. Corporate Bond Option-Adjusted Spreads (OAS) by Rating

September 2025 v. 20-Year Average

Resilient corporate earnings and strong economic data have driven a continued demand for both investment grade and high yield debt. As a result, credit spreads across the quality spectrum remain tight relative to historical averages, with investment grade spreads at their lowest level over the past twenty years.

Q3 2025 | Technology Investment & Economic Growth

Figure 12. Economic Growth Contributors: Technology v. Other

June 2022 to June 2025

Figure 13. Contribution to Real GDP Growth

Average of Q1/Q2 2025, Seasonally Adjusted & Annualized

Over the last several years, business investment in technology has become a more meaningful contributor to economic growth. While non-technology investment has detracted from real GDP growth over recent quarters, technology investment has more than made up, with its contribution equaling that of consumer spending.

1. Technology investment represented by information processing equipment and software. Government and net export contribution to economic growth not shown (together these net to 0% contribution).

Q3 2025 | Residential Housing Market

Figure 14. U.S. New Home Sales & U.S. New Home Inventory

June 2005 to June 2025

Figure 15. U.S. Homebuyer Affordability Index

1Y Simple Moving Average (SMA): June 2005 to June 2025

While the availability of residential real estate continues to increase, sales of new homes have not kept up, as affordability among consumers has fallen to some of the lowest levels seen over the past two decades. Relatively high interest rates and rising home prices have been primary contributors to the decline in affordability.

1. The U.S. Homebuyer Affordability Index measures whether the median-income family has enough earnings to qualify for a fixed-rate mortgage on a median-priced home. A value of 100 means the median family has exactly the necessary income, while values above 100 indicate greater affordability, and values below 100 indicate less affordability.

Voya Fixed Account – 457/401 II

The Voya Fixed Account – 457/401 II is available through a group annuity or other type of contract issued by Voya Retirement Insurance and Annuity Company ("VRIAC" or the "Company"). The Voya Fixed Account – 457/401 II is an obligation of VRIAC's general account which supports all of the Company's insurance and annuity commitments. All guarantees are based on the financial strength and claims-paying ability of VRIAC, which is solely responsible for all obligations under its contracts.

Asset Class: Stability of Principal

Important Information

This information should be read in conjunction with your contract prospectus, contract prospectus summary or disclosure booklet, as applicable. Please read them carefully before investing.

Please refer to the Morningstar Disclosure and Glossary document contained in your plan's eligibility package for additional information. You may always access the most current version of the Disclosure and Glossary at <https://www.voyaretirementplans.com/fundonepagerscolor/DisclosureGlossary.pdf>

Voya Retirement Insurance and Annuity Company

One Orange Way
Windsor, CT 06095-4774
www.voyaretirementplans.com

Objective

Stability of principal is the primary objective of this investment option. The Voya Fixed Account – 457/401 II guarantees minimum rates of interest and may credit interest that exceeds the guaranteed minimum rates. Daily credited interest becomes part of principal and the investment increases through compound interest. All amounts invested by your plan in the Voya Fixed Account – 457/401 II receive the same credited rate. This is known as a portfolio method of interest rate crediting.

Key Features

The Voya Fixed Account – 457/401 II is intended to be a long-term investment for participants seeking stability of principal. The assets supporting it are invested by VRIAC with this goal in mind. Therefore, VRIAC may impose restrictions on transfers and withdrawals involving the Voya Fixed Account – 457/401 II if Competing Investment Options (as defined below) are offered, or if you have

a choice between multiple service providers. These restrictions help VRIAC to provide stable credited interest rates which historically have not varied significantly from month to month despite the general market's volatility in new money interest rates.

Restrictions on Transfers from the Voya Fixed Account – 457/401 II

Transfers from the Voya Fixed Account – 457/401 II will be subject to the equity wash restrictions shown below.

Equity Wash Restrictions on Transfers

Transfers between investment options are allowed at any time, subject to the following provisions:

- (a) Direct transfers from the Voya Fixed Account – 457/401 II cannot be made to a Competing Investment Option.
- (b) A transfer from the Voya Fixed Account – 457/401 II to other investment options under the contract cannot be made if a transfer to a Competing Investment Option has taken place within 90 days.
- (c) A transfer from the Voya Fixed Account – 457/401 II to other investment options under the contract cannot be made if a non-benefit withdrawal from a non-Competing Investment Option has taken place within 90 days; and
- (d) A transfer from a non-Competing Investment Option to a Competing Investment Option cannot be made if a transfer from the Voya Fixed Account – 457/401 II has taken place within 90 days.

Competing Investment Option

As used throughout this document, a Competing Investment Option is defined as any investment option that:

- (a) Provides a direct or indirect investment performance guarantee;
- (b) Is, or may be, invested primarily in assets other than common or preferred stock;
- (c) Is, or may be, invested primarily in financial vehicles (such as mutual funds, trusts or insurance company contracts) which are invested in assets other than common or preferred stock;
- (d) Is available through an account with a brokerage firm designated by the Company and made available by the Contract Holder (as defined in the contract) as an additional investment under the plan;

- (e) Is a self-directed brokerage arrangement;
- (f) Is any fund with similar characteristics to the above as reasonably determined by the Company; or
- (g) Is any fund with a targeted duration of less than three years (e.g., money market funds).

For more information regarding Competing Investment Options in your plan, please contact the Customer Contact Center at (800) 584-6001.

Requests for Full Withdrawals

If the contract is surrendered completely, or if you surrender your account to transfer to another carrier within the plan, a Market Value Adjustment ("MVA") may be applied to the Voya Fixed Account – 457/401 II portion of your account (or the Contract Holder may elect to have the surrendered amount paid out over a period of 60 months, with interest paid). This MVA would not apply to any distribution made to you as a benefit payment. Please refer to your contract prospectus, contract prospectus summary or disclosure booklet, as applicable, for more information.

Interest Rate Structure

The Voya Fixed Account – 457/401 II guarantees principal and a guaranteed minimum interest rate ("GMIR") for the life of the contract, as well as featuring two declared interest rates: a current rate, determined at least monthly, and a guaranteed minimum floor rate declared for a defined period – currently one calendar year. The guaranteed minimum floor rate may change after a defined period, but it will never be lower than the GMIR that applies for the life of the contract. The current rate, the GMIR are expressed as annual effective yields. Taking the effect of compounding into account, the interest credited to your account daily yields the then current credited rate.

VRIAC's determination of credited interest rates reflects a number of factors, which may include mortality and expense risks, interest rate guarantees, the investment income earned on invested assets and the amortization of any capital gains and/or losses realized on the sale of invested assets. Under this option, VRIAC assumes the risk of investment gain or loss by guaranteeing the principal amount you allocate to this option and promising minimum interest rates during the

accumulation period and also throughout the annuity payout period, if applicable.

The current rate to be credited under a contract may be higher than the guaranteed minimum floor rate and the GMIR, and may be changed at any time, except that VRIAC will not apply a decrease to the current rate following a rate change initiated solely by us prior to the last day of the three-month period measured from the first day of the month in which such change was effective. The current rate for a plan's initial investment in the Voya Fixed Account – 457/401 II may be in effect for less than a full three-month period.

Any insurance products, annuities and funding agreements that you may have purchased are issued by Voya Retirement Insurance and Annuity Company ("VRIAC"). VRIAC is solely responsible for meeting its obligations. Plan administrative services provided by VRIAC or Voya Institutional Plan Services, LLC ("VIPS"). Neither VRIAC nor VIPS engage in the sale or solicitation of securities. If custodial or trust agreements are part of this arrangement, they may be provided by Voya Institutional Trust Company. All companies are members of the Voya® family of companies. Securities distributed by Voya Financial Partners, LLC (member SIPC) or other broker-dealers with which it has a selling agreement. All products or services may not be available in all states.

Voya Government Money Market A

Benchmark: 90 Day U.S. Treasury Bill

Peer Group: Money Market-Taxable

Fund Investment Policy

The investment seeks to provide investors with a high level of current income consistent with preservation of capital and liquidity and the maintenance of a stable \$1.00 net asset value per share.

The fund invests at least 99.5% of its total assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. In addition, under normal market conditions, it invests at least 80% of its net assets (plus borrowings for investment purposes) in government securities and repurchase agreements that are collateralized by government securities.

Vanguard Federal Money Market Investor

As of September 30, 2025

Benchmark: 90 Day U.S. Treasury Bill

Peer Group: Money Market-Taxable

Fund Investment Policy

The investment seeks to provide current income while maintaining liquidity and a stable share price of \$1. The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The adviser maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

Fund Investment Policy	
The investment seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg U.S. Aggregate Bond Index.	
The fund normally invests at least 80% of the fund's assets in bonds included in the Bloomberg U.S. Aggregate Bond Index. Its manager uses statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg U.S. Aggregate Bond Index using a smaller number of securities. The fund invests in Fidelity's central funds.

Fidelity Interim Trs Bd Index

As of September 30, 2025

Benchmark: Blmbg. U.S. Treasury: 5-10 Year

Peer Group: Intermediate Government

Fund Information

Portfolio Manager	Bettencourt,B/Eswara,V/Lande,M
PM Tenure	11 Years 4 Months
Fund Style	Intermediate Government
Fund Family	Fidelity Investments
Ticker	FUAMX
Fund Inception	10/04/2017
Fund Assets	\$6,958 Million
Net Expense(%)	0.03 %
Median Expense(%)	0.68

Fund Investment Policy

The investment seeks a high level of current income.

The fund normally invests at least 80% of assets in securities included in the Bloomberg U.S. 5-10 Year Treasury Bond Index. It normally maintains a dollar-weighted average maturity that generally is expected to be between three and 10 years, consistent with that of the index. The advisor uses statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg U.S. 5-10 Year Treasury Bond Index using a smaller number of securities.

Hartford Core Equity R6

As of September 30, 2025

Benchmark: S&P 500 Index

Peer Group: Large Blend

Fund Investment Policy

The investment seeks growth of capital. Under normal circumstances, the fund invests at least 80% of its assets in common stocks. Its portfolio seeks to be broadly diversified by industry and company. The fund may invest in a broad range of market capitalizations, but the advisor tends to focus on large capitalization companies with market capitalizations similar to those of companies in the S&P 500 Index.

Baron Growth Instl

As of September 30, 2025

Benchmark: Russell Midcap Growth Index

Peer Group: Mid-Cap Growth

Fund Investment Policy

The investment seeks capital appreciation through long-term investments primarily in securities of small-sized growth companies.

The fund invests for the long term primarily in equity securities in the form of common stock of U.S. small-sized growth companies. BAMCO, Inc. ("BAMCO" or the "Adviser") defines small-sized companies as those, at the time of purchase, with market capitalizations up to the largest market cap stock in the Russell 2000 Growth Index at reconstitution, or companies with market capitalizations up to \$2.5 billion, whichever is larger.

DFA US Small Cap I

As of September 30, 2025

Benchmark: Russell 2000 Index

Peer Group: Small Blend

Fund Investment Policy

The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.

MFS Intl Diversification R6

As of September 30, 2025

Benchmark: MSCI AC World ex USA (Net)

Peer Group: Foreign Large Blend

Fund Investment Policy

The investment seeks capital appreciation. The fund is designed to provide diversification within the international asset class by investing the majority of its assets in other mutual funds advised by the adviser, referred to as underlying funds. The adviser seeks to diversify the fund's investments in terms of market capitalization (by including large, mid, and/or small cap underlying funds), by style (by including both growth and value underlying funds), and by geography (by including developed and emerging market underlying funds).

Vanguard Target Retirement Income Fund

As of September 30, 2025

Benchmark: Vanguard Target Income Composite Index

Peer Group: Target-Date Retirement

Fund Investment Policy

The investment seeks to provide current income and some capital appreciation.

The fund invests in a mix of Vanguard mutual funds according to an asset allocation strategy designed for investors currently in retirement. Its indirect bond holdings are a diversified mix of short-, intermediate-, and long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other than the U.S. dollar.

Vanguard Target Retirement 2020 Fund

As of September 30, 2025

Benchmark: Vanguard Target 2020 Composite Index

Peer Group: Target-Date 2020

Fund Investment Policy

The investment seeks to provide capital appreciation and current income consistent with its current asset allocation. The fund invests in a mix of Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2020 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

Vanguard Target Retirement 2045 Fund

As of September 30, 2025

Benchmark: Vanguard Target 2045 Composite Index

Peer Group: Target-Date 2045

Fund Investment Policy

The investment seeks to provide capital appreciation and current income consistent with its current asset allocation. The fund invests in a mix of Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2045 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

Vanguard Target Retirement 2070 Fund

As of September 30, 2025

Benchmark: Vanguard Target 2070 Composite Index

Peer Group: Target-Date 2065+

Fund Investment Policy

The investment seeks to provide capital appreciation and current income consistent with its current asset allocation. The fund invests in a mix of Vanguard mutual funds (underlying funds) according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2070 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase.

All data and information on this fact sheet is taken from sources believed to be accurate but is not guaranteed to be accurate, complete, or correct.

Important Disclosures:

Investment Advisory: The Fiduciary Consulting Group (“FCG”) is a business unit within Morgan Stanley Institutional Investment Advisors, LLC (“MSIIA”). MSIIA is registered with Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940, as amended. Therefore, MSIIA is a fiduciary when providing investment advisory services.

For retirement plan (“Plan”) clients, MSIIA is an investment advisor and fiduciary retained by the Plan client in relation to the investments in the Plan. MSIIA is not retained and does not serve in capacity as an investment advisor or fiduciary to self-directed brokerage investment or to Plan participants.

Additional information about FCG is also available on the SEC’s website at: www.adviserinfo.sec.gov.

ERISA/Code: When MSIIA, its affiliates and consultants provide “investment advice” regarding a retirement plan account, MSIIA is a “fiduciary” as those terms are defined under the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), and/or the Internal Revenue Code of 1986 (the “Code”), as applicable. When MSIIA provides investment education or otherwise does not provide “investment advice”, MSIIA will not be considered a “fiduciary” under ERISA and/or the Code.

Intended Audience: The material in this performance report (“Report”) is intended solely for the use of the persons to whom it has been delivered. The information is intended for the client’s internal use only and may not be distributed, in whole or in part, to a client’s Plan participants or to the public. This report may not be posted on any participant or public websites or other social media.

Sources of Information: The information in this Report is provided as part of the services you receive from your FCG consultant, and does not supersede or replace your customer account statement provided by your custodian (“Custodial Statement”). Information in this Report may vary slightly from the information in your Custodial Statement as a result of differences in accounting procedures, reporting dates, or valuation methodologies of certain securities. The information in this Report is as of the date(s) noted and subject to daily market fluctuation.

Asset balances and plan participant activity included in this Report are provided to FCG by the Plan’s custodian or recordkeeper. Mutual fund products or exchange traded funds (together, “Fund”)’s performance and characteristics, asset classes, benchmark indices and market data included in this report are provided to FCG by external data sources.

Accuracy and Changes to Report: This document contains data obtained from sources believed to be reliable, but such data is not guaranteed as to its accuracy and does not purport to be complete. Reasonable professional care was exercised in preparing this Report, but FCG cannot guarantee the accuracy of the information provided to FCG by external data sources and by the Plan’s custodian or recordkeeper.

FCG is also under no obligation to update information in this Report. Please be advised that any numbers referenced in this Report are subject to revision. FCG is not responsible for updating those figures that have changed. FCG accepts no liability for loss arising from the use of the material presented in this Report. This Report document should not be relied on in substitution for the exercise of independent judgment.

The opinions expressed herein by FCG are not intended to be a forecast of future events, a guarantee of future results or investment advice, and are subject to change based on market and other conditions. FCG has no obligation to tell you when those opinions or information may change.

Differences between FCG and Morgan Stanley affiliates: FCG’s views and opinions contained herein may differ materially from the views and opinions of Morgan Stanley affiliates.

Not Legal/Accounting Advice: The information in this Report is not intended to constitute legal or accounting advice. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument.

Performance: Net performance results illustrated herein do not reflect a deduction of any investment advisory fees charged by FCG or any investment manager but do include the fund's internal expenses. Net performance results are annualized for time periods greater than one year and include all cash and cash equivalents, realized and unrealized capital gains and losses, and dividends, interest, and income. The investment results depicted herein represent historical performance.

A Fund's internal expenses (also known as the expense ratio) generally cover investment management fees, marketing, and distribution fees (also known as 12b-1 fees) and other operating expenses of the fund. The expense ratios being displayed for mutual funds reflect each fund's "net" expenses as provided by Morningstar as per the fund's prospectus. Such "net" expenses are subject to change and may increase at any time. You can obtain performance data for each Fund by visiting the fund company website. Fund performance information contained in this report does not represent a recommendation by FCG.

Current performance may vary from the figures shown. Past performance is not a guarantee of future results.

Performance data quoted is historical. . The investment return and principal value of an investment will fluctuate such that an investor's shares, when redeemed, may be worth more or less than their original cost. Total returns include reinvestment of dividends and capital gains and are net of all Fund fees and expenses.

Performance figures are based on the investment's Net Asset Value (NAV) within a qualified retirement plan. If an individual were to make an investment outside of a qualified plan, they would likely be subject to all, or a portion of, any applicable sales charges. These charges would lower the performance indicated above.

Each investment's performance may, from time to time, have been affected significantly by material market and economic conditions, including interest rates, market trends, and general business and economic cycles, which may or may not be repeated in the future.

Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only and do not represent the performance of any specific investment. Index returns include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment. The indices selected by FCG to measure performance are representative of broad asset classes. FCG retains the right to change representative indices at any time. Performance of indices may be more or less volatile than any investment product. The risk of loss in value of a specific investment is not the same as the risk of loss in a broad market index. Therefore, the historical returns of an index will not be the same as the historical returns of a particular investment a client selects. Past performance does not guarantee future results.

Key Comparisons between CITs and Mutual Funds. CITs are tax-qualified investments primarily restricted to the retirement market so investors tend to have a longer-term horizon and the trustee can make investment decisions without tax considerations. Mutual funds are not subject to these investor limits or investment horizons and must distribute substantially all of their taxable net gains and income to investors. CIT expense structures can be customized to investor channels. Mutual funds generally have less fee flexibility. CITs tend to have lower administrative, marketing and distribution costs than mutual funds due to the differences in how they can be sold and to whom. CITs are maintained by a bank as trustee and are subject to federal or state banking regulation and ERISA fiduciary standards. Mutual funds are managed by registered investment advisers and are subject to extensive SEC regulation and public disclosure and reporting requirements. Both CITs and mutual funds are generally priced and traded daily, subject to annual financial audits, and benefit from their pooled structure that aggregates investor funds and can provide greater diversification than individual accounts.

Investment Policy Statement: The "Investment Policy Statement Compliance Report" indicates funds that are on the client's Plan "Watch List", as based on investment monitoring criteria which is provided to FCG by the client. The client should inform its FCG Consultant of any changes to the investment policy for the client's plan.

Fund data provided by Morningstar.

Key Asset Class Risk Disclosures. Investing involves market risk, including possible loss of principal. Please refer to MSIIA's Form ADV Brochure for more information about the risks associated with certain investment products. The FCG's Form ADV Brochure is available upon request.

All Funds are sold by prospectus, which contain more complete information about a fund, its expenses and material risks related to that fund's investment strategy. Please contact your FCG consultant for a copy of a fund's prospectus.

All investments involve risk and potentially a loss of money. Investments in bonds are subject to interest rate, credit, and inflation risk. Foreign investments involve special risks, including currency fluctuations, taxation differences and political developments. Equity securities of small and mid-sized companies may be more volatile than securities of larger, more established companies. Real estate securities and trusts involve greater risks than other non-diversified investments, including but not limited to: declining property values, varying economic conditions, changes in zoning laws, or losses from casualty. Real estate securities that invest in foreign real estate involve additional risk, including currency fluctuations and political developments. Target Date Funds provide a dynamic asset allocation that adjusts over time based upon a participant's age and distance from retirement. The glidepath structure is based upon an assumed retirement age of 65. The underlying investments are subject to market risk (including falling share prices), interest rate risk, credit risk, inflation risk, and other risks, including any risks assumed by the underlying funds. Diversification does not ensure a profit or protect against a loss. The principal value of any investment is not guaranteed at any time.

This document is intended for educational purposes only and should not be construed as investment advice. This document may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements are those that predict or describe future events or trends and that do not relate solely to historical matters. Actual results could and likely will differ, sometimes materially, from those projected or anticipated. FCG is not undertaking any obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise. You should not take any statements regarding past trends as a representation those trends or activities will continue in the future. Accordingly, you should not put undue reliance on these statements.

Peer Groups: Peer Groups are a collection of similar investment strategies that essentially group investment products that share the same investment approach. Peer Groups are used for comparison purposes to compare and illustrate a client's investment portfolio versus its peer across various quantitative metrics like performance and risk. Peer Group comparison is conceptually another form of benchmark comparison whereby the actual investment can be ranked versus its peer across various quantitative metrics. All Peer Group data are provided by Investment Metrics, LLC. The URL below provides all the definitions and methodology about the various Peer Groups <https://www.invmetrics.com/style-peer-groups>

Peer Group Ranking Methodology: A percentile rank denotes the value of a product in which a certain percent of observations falls within a peer group. The range of percentile rankings is between 1 and 100, where 1 represents a high statistical value and 100 represents a low statistical value. The 30th percentile, for example, is the value in which 30% of the highest observations may be found, the 65th percentile is the value in which 65% of the highest observations may be found, and so on.

Percentile rankings are calculated based on a normalized distribution ranging from 1 to 100 for all products in each peer group, where a ranking of 1 denotes a high statistical value and a ranking of 100 denotes a low statistical value. It is important to note that the same ranking methodology applies to all statistics, implying that a ranking of 1 will always mean highest value across all statistics.

For example, consider a risk/return assessment using standard deviation as a measure of risk. A percentile ranking equal to 1 for return denotes highest return, whereas a percentile ranking of 1 for standard deviation denotes highest risk among peers.

In addition, values may be used to demonstrate quartile rankings. For example, the third quartile is also known as the 75th percentile, and the median is the 50th percentile.

Environmental, Social and Governance (“ESG”) investments in a portfolio may experience performance that is lower or higher than a portfolio not employing such practices. Portfolios with ESG restrictions and strategies as well as ESG investments may not be able to take advantage of the same opportunities or market trends as portfolios where ESG criteria is not applied. There are inconsistent ESG definitions and criteria within the industry, as well as multiple ESG ratings providers that provide ESG ratings of the same subject companies and/or securities that vary among the providers. Certain issuers of investments may have differing and inconsistent views concerning ESG criteria where the ESG claims made in offering documents or other literature may overstate ESG impact. ESG designations are as of the date of this material, and no assurance is provided that the underlying assets have maintained or will maintain and such designation or any stated ESG compliance. As a result, it is difficult to compare ESG investment products or to evaluate an ESG investment product in comparison to one that does not focus on ESG. Investors should also independently consider whether the ESG investment product meets their own ESG objectives or criteria.

There is no assurance that an ESG investing strategy or techniques employed will be successful. Past performance is not a guarantee or a dependable measure of future results.
