- A** The Fund Inception Date represents the first date the fund received money.
- B** The Investment Income Ratio represents dividends received by the Division, excluding capital gains distributions, divided by the average net assets. The recognition of investment income is determined by the timing of the declaration of dividends by the underlying fund in which the Division invests.
- C** The Expense Ratio considers only the annualized contract expenses borne directly by the Account, excluding expenses charged through the redemption of units, and is equal to the mortality and expense, administrative, and other charges, as defined in the Charges and Fees Note.
- D** Total Return is calculated as the change in unit value for each Contract presented in the Statement of Assets and Liabilities. These percentages represent the range of total returns available as of the report date and correspond with the expense ratio lowest to highest.
- (a) As subaccount had no investments until 2021, this data is not meaningful and therefore not presented.
- (b) As subaccount had no investments until 2022, this data is not meaningful and therefore not presented.
