VOYA RETIREMENT INSURANCE AND ANNUITY COMPANY
SEPARATE ACCOUNT D
Notes to Financial Statements

1. ORGANIZATION

Voya Retirement Insurance and Annuity Company Separate Account D (the “Account”) was established by Voya Retirement Insurance and Annuity Company (“VRIAC” or the “Company”) to support the operations of variable annuity contracts (“Contracts”). The Company is an indirect, wholly owned subsidiary of Voya Financial, Inc., a holding company domiciled in the State of Delaware.

The Account is not registered as a unit investment trust with the Securities and Exchange Commission under the Investment Company Act of 1940, by virtue of the provisions of Section 3(c)(11) thereof. The Account is sold exclusively for use with variable annuity contracts that may be entitled to tax-deferred treatment under specific sections of the Internal Revenue Code (“IRC”) of 1986, as amended. VRIAC provides for variable accumulation and benefits under the Contracts by crediting annuity considerations to one or more subaccounts within the Account or an investment option in the Company's fixed account, as directed by the contract owners who bear the investment risk. The portion of the Account's assets applicable to Contracts will not be charged with liabilities arising out of any other business VRIAC may conduct, but obligations of the Account, including the promise to make benefit payments, are obligations of VRIAC. Under applicable insurance law, the assets and liabilities of the Account are clearly identified and distinguished from the other assets and liabilities of VRIAC.

The Account has one reporting segment. The Director and President of the Company is the chief operating decision maker (“CODM”). The CODM reviews the Net increase (decrease) in net assets resulting from operations as presented in the Statement of Operations and assesses year-over-year changes in evaluating operating performance and allocating resources. The measure of segment assets is reported on the Statement of Assets and Liabilities as Net assets. Significant expenses regularly provided to the CODM are consistent with those presented in the Statement of Operations.

As of December 31, 2025, the Account had 3,539 subaccounts, 3,184 of which invest in independently managed mutual funds and 355 of which invest in mutual funds managed by an affiliate, either Voya Investments, LLC or Voya Investment Trust Co. The assets in each subaccount are invested in shares of a designated fund of various investment trusts (the “Trusts”). The subaccounts with asset balances at December 31, 2025 are as follows:

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies of the Account:

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investments

Investments are made in shares of a subaccount and are recorded at fair value, determined by the net asset value per share of the respective subaccount. Investment transactions in each subaccount are recorded on the trade date. Distributions of net investment income and capital gains from each subaccount are recognized on the ex-distribution date. Realized gains and losses on redemptions of the shares of the subaccount are generally determined using the specific identification method. The difference between cost and current fair value of investments owned on the day of measurement is recorded as unrealized appreciation or depreciation of investments.

SEPARATE ACCOUNT D
Notes to Financial Statements

Federal Income Taxes

Operations of the Account form a part of, and are taxed with, the total operations of VRIAC, which is taxed as a life insurance company under the Internal Revenue Code ("IRC"). Under the current provisions of the IRC, the Company does not expect to incur federal income taxes on the earnings of the Account to the extent the earnings are credited to contract owners. Accordingly, earnings and realized capital gains of the Account attributable to the contract owners are excluded in the determination of the federal income tax liability of VRIAC, and no charge is being made to the Account for federal income taxes for these amounts. The Company will review this tax accounting in the event of changes in the tax law. Such changes in the law may result in a charge for federal income taxes. Uncertain tax positions are assessed at the parent level on a consolidated basis, including taxes of the operations of the Separate Account.

Contract Owner Reserves

The annuity reserves of the Account are represented by net assets on the Statement of Assets and Liabilities and are equal to the aggregate account values of the contract owners invested in the subaccounts. Net assets allocated to contracts in the payout period are computed according to the industry standard mortality tables. The assumed investment return is elected by the annuitant and may vary from 3.50% to 5.00%. The mortality risk is fully borne by the Company. To the extent that benefits to be paid to the contract owners exceed their account values, VRIAC will contribute additional funds to the benefit proceeds. Conversely, if amounts allocated exceed amounts required, transfers may be made to VRIAC. Prior to the annuitization date, the Contracts are redeemable for the net cash surrender value of the Contracts.

Changes from Principal Transactions

Included in Changes from principal transactions on the Statements of Changes in Net Assets are items which relate to contract owner activity, including deposits, surrenders and withdrawals, death benefits, and contract charges. Also included are transfers between the fixed account and the subaccounts, transfers between subaccounts, and transfers to (from) VRIAC related to gains and losses resulting from actual mortality experience (the full responsibility for which is assumed by VRIAC).

Subsequent Events

The Company has evaluated all events through the date the financial statements were issued to determine whether any event required either recognition or disclosure in the financial statements. The Company is not aware of any subsequent events that would have a material effect on the financial statements of the Account.

3. FINANCIAL INSTRUMENTS

The Account invests assets in shares of open-end mutual funds, which process orders to purchase and redeem shares on a daily basis at the fund's next computed net asset values ("NAV"). The fair value of the Account's assets is based on the NAVs of mutual funds, which are obtained from the transfer agents or fund companies and reflect the fair values of the mutual fund investments. The NAV is calculated daily upon close of the New York Stock Exchange and is based on the fair values of the underlying securities.

The Account's assets are recorded at fair value on the Statement of Assets and Liabilities and are categorized as Level 1 as of December 31, 2025 based on the priority of the inputs to the valuation technique below. There were no transfers among the levels for the year ended December 31, 2025. The Account had no liabilities as of December 31, 2025.

The Account categorizes its financial instruments into a three-level hierarchy based on the priority of inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market. The Account defines an active market as a market in which transactions take place with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 - Quoted prices in markets that are not active or valuation techniques that require inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
 - a. Quoted prices for similar assets or liabilities in active markets;
 - b. Quoted prices for identical or similar assets or liabilities in non-active markets;

VOYA RETIREMENT INSURANCE AND ANNUITY COMPANY
SEPARATE ACCOUNT D
Notes to Financial Statements

- c. Inputs other than quoted market prices that are observable; and
- d. Inputs that are derived principally from or corroborated by observable market data through correlation or other means.
- Level 3 - Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These valuations, whether derived internally or obtained from a third party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability.

4. CHARGES AND FEES

Under the terms of the Contracts, certain charges and fees are incurred by the Contracts to cover VRIAC's expenses in connection with the issuance and administration of the Contracts. Following is a summary of these charges and fees:

Mortality and Expense Risk Charges

VRIAC assumes mortality and expense risks related to the operations of the Account and, in accordance with the terms of the Contracts, deducts a daily charge from the assets of the Account. Daily charges are deducted at annual rates of up to 2.35% of the average daily net asset value of each subaccount of the Account to cover these risks, as specified in the Contracts. These charges are assessed through a reduction in unit values.

Asset-Based Administrative Charges

A charge to cover administrative expenses of the Account is deducted at an annual rate of 0.50% of the assets attributable to the Contracts. These charges are assessed through a reduction in unit values.

Contract Maintenance Charges

An annual Contract maintenance fee of up to \$20 may be deducted from the accumulation value of Contracts to cover ongoing administrative expenses, as specified in the Contract. These charges are assessed through the redemption of units.

Contingent Deferred Sales Charges

For certain Contracts, a contingent deferred sales charge ("Surrender Charge") is imposed as a percentage of each premium payment if the Contract is surrendered or an excess partial withdrawal is taken, as specified in the Contract. These charges are assessed through the redemption of units.

Other Contract Charges

For certain Contracts, an additional annual charge of up to 1.00% is deducted daily from the accumulation value of Contracts for contract owners who selected the Guaranteed Minimum Income feature. These charges are assessed through the redemption of units.

5. RELATED PARTY TRANSACTIONS

Management fees were paid to Voya Investments, LLC, an affiliate of the Company, in its capacity as investment adviser to Voya Equity Trust, Voya Funds Trust, Voya Government Money Market Portfolio, Voya Intermediate Bond Portfolio, Voya Investors Trust, Voya Mutual Funds, Voya Partners, Inc., Voya Separate Portfolios Trust, Voya Variable Funds, Voya Variable Portfolios, Inc., and Voya Variable Products Trust. The investment advisory agreements of the Trusts provide for fees at annual rates ranging from 0.18% to 1.25% of the average net assets of each respective fund.
